## DETAILED ACTION

### *Drawings*

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6,381,869 to Lunan.

4. Lunan teaches a method and apparatus for microwave drying comprising lining the materials to be dried 12 with ceramic slabs 22 and 24 having horizontal holes 26 and 28, placing the slabs 22 and 24 and materials to be dried 12 in a microwave oven, and exposing the slabs 22 and 24 and materials 12 to microwave irradiation under atmospheric pressure, wherein the slabs 22 and 24 absorb moisture from the materials 12 while they are dried. Note column 2, lines 18-48 and Figure 1.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3749

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lunan as applied to claim 5 above, and further in view of US Patent 5,948,311 to Beecroft et al. and US Patent 5,859,412 to Yagi.

7. Lunan does not define the frequency of the microwave irradiation or the temperature used in his method. However, Beecroft et al. teaches a similar microwave drying method utilizing a microwave frequency of 2500 MHz and Yagi teaches a similar microwave drying method utilizing a drying temperature of 60 degrees Celsius. Since Beecroft et al. and Yagi teach that the values claimed are known to be used by those in the art and since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art (see *In re Aller*, 105 USPQ 233), it would have been obvious to one of ordinary skill in the art to use the claimed values with the method taught by Lunan.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Levinson teaches a similar microwave method and apparatus.
